

Revaz Nakhutsrishvili Software Engineer, Full-Stack

Tbilisi, GE · revaz.xyz · r@revaz.xyz · github.com/R3V4Z · linkedin.com/in/revaznakhutsrishvili

Work Experience

Spinbet Software Engineer, Full-Stack Nov. 2023 – Aug. 2024
Remote

- Architected a standalone chat platform shared across multiple applications, providing a seamless experience for over 30,000 users while prioritizing security.
- Designed and implemented an advanced provably-fair algorithm with verification modules and the APIs that ensures transparency for over 15,000 daily active users using Node.js, Nest.js, PostgreSQL and AWS.
- Onboarded and trained 5 new employees on the company's development and product stack.

Selli AG Software Engineer, Full-Stack Mar. 2023 – Nov. 2023
Remote

- Improved maintainability of core matching engine by reverse engineering existing legacy code, isolating into different domains, and migrating to standalone services.
- Created custom multi-level filters for map interfaces, improving user experience by allowing custom searches and faster matches.
- Boosted web-app efficiency and reduced load times by 50%, fixing bottlenecks contributing to delays.

Bunji SAS Software Engineer, Full-Stack Apr. 2022 – Mar. 2023
Remote

- Improved customer conversion by 30% by implementing local scheduling system and integrating with Google and Microsoft product APIs, PostgreSQL, and Sequelize.
- Achieved the successful deployment of three major releases within a tight time frame of four months, enhancing application functionality and improving user-experience for over 10,000 active users.
- Implemented key features including local calendar, multiple campaign types for real-estate agents, and filtered notification system for clients.

Pfizer Software Engineer, Full-Stack Apr. 2021 – Apr. 2022
Remote

- Designed and built a web-app to record and analyse patients progress and side-effects on a given medicine, using Web Components, Node.js, Express.js, and MongoDB.
- Successfully launched XELJANZ project, a web application aiding in patients health management.
- Created APIs for easily migrating the XELJANZ app into other CRMs.

Esflow Software Engineer, Full-Stack Aug. 2020 – Apr. 2021
Remote

- Designed and developed a web application for Eredivisie clubs using TypeScript, Next.js, Node.js, Nest.js, PostgreSQL, and Microsoft Azure, for live-streaming and analysing teams training sessions.
- Worked on fetching APIs from multiple data-sources using Nest.js and PostgreSQL.
- Created numerous UI components and pages for Relocify app with React.js, Redux.js, and Rebase UI.

Circle Software Engineer, Front-End May. 2018 – Jul. 2020
Tbilisi, GE

- Managed team of 3 front-end developers to successfully launch company-owned start-up Hiring.ge, using React.js and Redux.js.
- Refactored payment feature of Shenia.com using React.js, resulting in a 70% increase in page load for each step of the process.
- Released updates of more than 10 websites, including Georgian Ministry of Education and Aptos Worldwide CRM.

Education

Business and Technology University BSc. Computer Science Sep. 2018 – Feb. 2019
Tbilisi, GE
